ABOUT ME

Frontend Developer with experience in building interactive applications (E-commerce, Inventory) using React.js and Next.js. Successfully improved system efficiency by up to 25% through internship projects. Skilled in developing responsive, user-friendly web interfaces and implementing modern front-end technologies.

EXPERIENCE

Dicoding x DBS Foundation, Remote   Feb 2025 – Sep 2025

Coding Camp powered by DBS Foundation Road to Future | Front-End Web Developer

- Completed 170+ hours of intensive training in front-end development (JavaScript, CSS Grid, Web Components, REST API, Webpack).
- Built interactive websites (DOM manipulation & Web Storage API) and modular front-end applications with API integration.
- Trained in JavaScript best practices: OOP, functional programming, asynchronous handling, and code quality.

Bantex Indonesia, Bogor   Jul 2023 – Dec 2023

Software Developer Internship

- Developed an inventory management system using React.js, Express.js, and MySQL, improving data input efficiency by 25%.
- Automated yearly document numbering, accelerating transaction processes and reducing input errors.
- Enhanced system performance and security with JWT authentication, testing, and debugging.

Core Initiative x Rakamin Academy   Jun 2023 – Jul 2023

Project-Based Virtual Intern: Front End

- Built an e-commerce web app using Vue.js and Firebase.
- Implemented unit testing and containerization with Docker.

Alterra Academy   Aug 2022 – Dec 2022

ReactJS Front-end Engineering Program

- Developed 3 interactive websites with React.js and integrated multiple REST APIs.
- Collaborated with backend, UI/UX, and QA teams in an Agile environment using GitHub Organization and Trello.
- Created technical documentation and workflows to support team collaboration.

EDUCATION

Universitas Bina Sarana Informatika, Depok   Aug 2020 – Aug 2024
Bachelor's Degree in Information Systems
GPA: 3.91 dari 4.00

TRAINING & CERTIFICATIONS

AWS x Orbit Feture Academy   Okt 2024 – Dec 2024

Cloud Computing: AWS re/Start Batch 10

- Full-time training on cloud computing fundamentals and core AWS services.
- Hands-on practice with Linux OS, Python, and shell scripting for automation.

- Implemented AWS services: EC2, S3, IAM, VPC, Lambda, CloudFormation, RDS, and Route53.
- Built and managed cloud-based solutions, including configuration, monitoring, and core services support.
